Instructions

THE PLANE
  -- Flip the paper over so that the printed fold lines are facing down.
 -- First fold forward, crease and open back up along both diagonal lines. Also fold back on the horizontal line and reopen.
  -- Then pull and tuck the folds together as shown in the first two drawings.
  -- Now fold the corners of the each triangle up, almost to the center line.
  -- Fold the nose of the plane back.
  -- Fold up along the center line and then fold down each wing.
  --Throw gently for distance...throw hard and up for overhead loops!
  --Note the different fold pattern in the photos and the alternate rudder.
  --Print the PDF full size, not to fit for best results
